

# MUSD - Mezo Hackathon Presentation

## Bitcoin-Native Stablecoin Payment System

### Slide 1: Title Slide

## Bitcoin-Native Stablecoin on Mezo

Enabling Bitcoin holders to transact with USD stability

### Mezo Hackathon Submission

🔗 GitHub: <https://github.com/fapulito/musd>

🌐 Deployed on Vercel

⚡ Powered by Mezo Passport

## Slide 2: The Problem

# 💡 The Challenge

**Bitcoin holders face a critical dilemma:**

**For Users:**

- 📈 Bitcoin's volatility makes everyday payments impractical
- 💳 Converting to stablecoins means leaving the Bitcoin ecosystem
- 🔒 New wallets and seed phrases create friction and security risks
- 💸 High fees and slow settlement on traditional rails

**For Merchants:**

- 💰 Want Bitcoin exposure but need price stability
- ⏳ Can't accept volatile assets for goods/services
- 🌎 Miss out on Bitcoin holder market (millions of users)
- 💳 Traditional payment processors charge 2-3% fees

**The Gap: No Bitcoin-native stablecoin solution exists**

## Slide 3: Our Solution

### ✨ MUSD: The Solution

#### Sign with Bitcoin, Transact with Stablecoins

#### How It Works:

1. Connect Bitcoin Wallet
  - ↳ Via Mezo Passport (no new accounts!)
2. Mezo Creates Smart Account
  - ↳ Account abstraction on Matsnet
3. Sign with Bitcoin Wallet
  - ↳ User maintains custody & control
4. Smart Account Executes
  - ↳ MUSD transfers on Matsnet

#### Key Innovation:

**MUSD- First Wallet-Native stablecoin Launched by a Self-Custodial Wallet**

# Slide 4: Technology Stack

## Built with Mezo

### Deep Integration with Mezo Ecosystem

#### Mezo Passport SDK ( [@mezo-org/passport@0.12.0](#) )

```
// Bitcoin wallet authentication
const { btcAddress, btcBalance } = useBitcoinAccount()

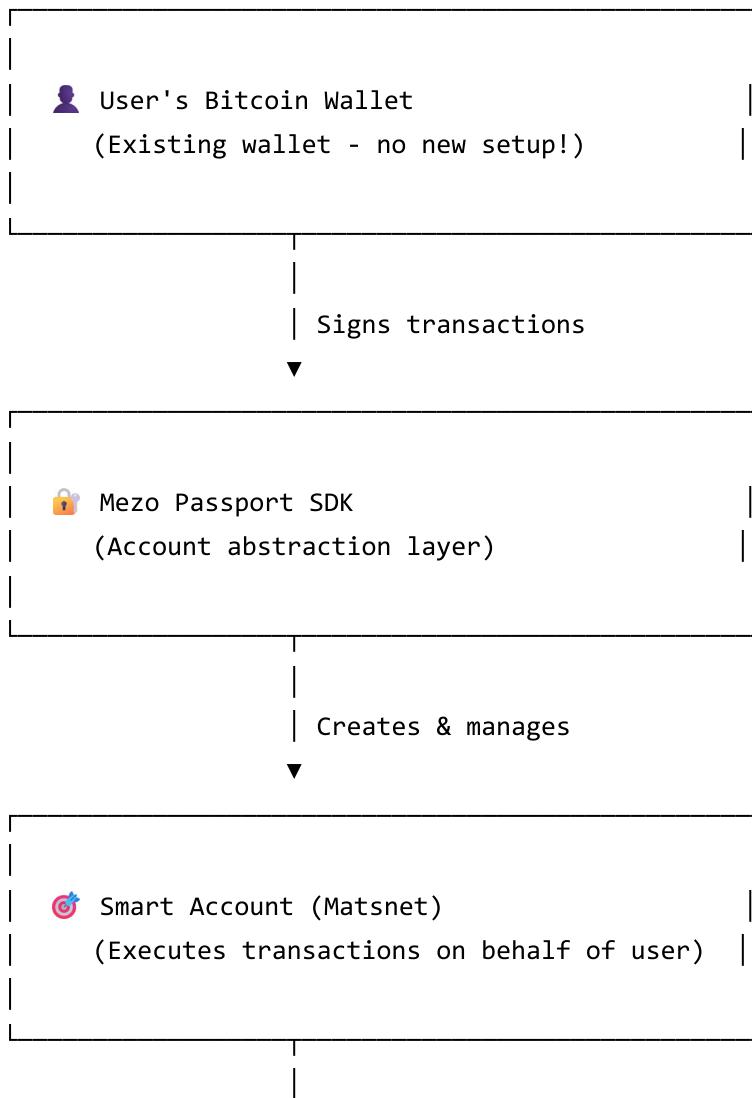

// Send MUSD with Bitcoin signature
const { sendTransaction } = useSendTransaction()
await sendTransaction(MUSD_TOKEN_ADDRESS, 0n, data)
```

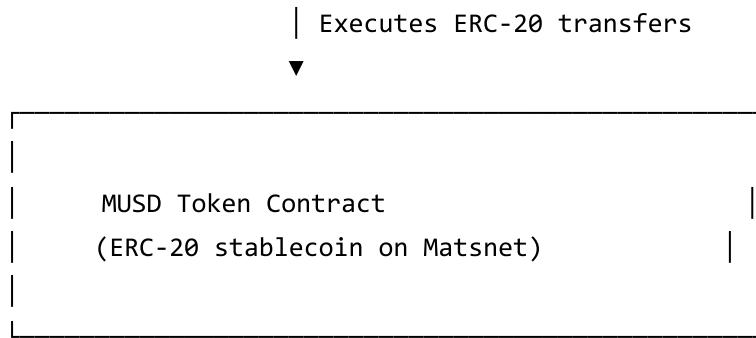

### Tech Stack:

- **Blockchain:** Solidity smart contracts on Matsnet
- **Frontend:** React 19 + TypeScript + Vite
- **Integration:** Mezo Passport + Wagmi + Viem
- **Backend:** Node.js + Express payment service
- **Deployment:** Vercel + Railway

## Slide 5: Architecture

# E System Architecture

**Result:** Bitcoin wallet controls USD-stable value seamlessly

## Slide 6: Key Features

### ★ What We Built

#### For Users

- **Bitcoin Wallet Auth** - Use existing wallet, no seed phrases
- **USD Stability** - Transact without volatility risk
- **Instant Transfers** - Fast transactions on Matsnet
- **Self-Custody** - Maintain control of your Bitcoin wallet
- **Simple UX** - Connect, send, done

## For Merchants

-  **Stable Settlement** - Accept Bitcoin-backed payments in USD
-  **Easy Integration** - REST API and payment links
-  **Real-Time Tracking** - Monitor transactions and balances
-  **Global Reach** - Access Bitcoin holder market
-  **Low Fees** - Cheaper than traditional processors

## For Developers

-  **Complete Docs** - Deployment guides and API docs
-  **Modern Stack** - React, TypeScript, Mezo SDK
-  **Test Suite** - Comprehensive smart contract tests
-  **Easy Deploy** - One-click Vercel + Railway setup

## Slide 7: Hackathon Deliverables

### What We Delivered

#### Complete Production-Ready System

##### 1. Smart Contracts

- ERC-20 MUSD token deployed on Matsnet

- Comprehensive Hardhat test suite
- Deployment scripts and documentation

## 2. React dApp

- Mezo Passport integration ( `useBitcoinAccount` , `useSendTransaction` )
- Custom hooks for wallet management ( `useWalletInfo` , `useSendMUSD` )
- Responsive UI with Tailwind CSS
- Real-time balance tracking (Bitcoin + Matsnet)

## 3. Payment Service

- Node.js + Express backend
- Transaction monitoring and webhooks
- Payment link generation
- Merchant API

## 4. Documentation

-  Complete deployment guides (Vercel, Railway, Boar, Spectrum)
-  Quick start guide (5-minute setup)
-  Troubleshooting documentation
-  System architecture overview

## 5. Production Infrastructure

- Vercel deployment configuration
- Railway backend hosting
- Environment management
- CI/CD ready

## Slide 8: Demo Flow

# User Experience

## Step-by-Step Demo

### 1 Connect Wallet

- User clicks "Connect Bitcoin Wallet"
- Mezo Passport opens
- User authenticates with existing Bitcoin wallet
- No new accounts, no seed phrases!

### 2 View Balances

Dashboard shows:

- Bitcoin wallet address & BTC balance
- Matsnet smart account address
- MUSD token balance
- Real-time updates

### 3 Send MUSD

User enters:

- Recipient address
- Amount in MUSD
- Clicks "Send"

### 4 Sign & Execute

- Bitcoin wallet prompts for signature
- User signs with Bitcoin wallet
- Smart account executes transfer on Matsnet
- Transaction confirmed in seconds

### 5 Merchant Receives

- Merchant receives MUSD (USD-stable)
- No volatility risk
- Instant settlement
- Lower fees than traditional processors

# Slide 9: Market Opportunity & Roadmap

## Growth Strategy

### Market Opportunity

#### Target Market Size

- **Bitcoin Holders:** 50M+ globally with \$1T+ market cap
- **E-commerce:** \$5.7T global market (2023)
- **Stablecoin Market:** \$150B+ and growing
- **Payment Processing:** \$2T+ annual volume

#### Our Niche

Bitcoin holders who want to spend without volatility

Merchants who want Bitcoin exposure with USD stability

### Roadmap

#### Q1 2025 - MVP Launch

- Matsnet deployment (DONE)
- Mezo Passport integration (DONE)

-  Production deployment (IN PROGRESS)
-  10-20 beta merchants
-  \$10K transaction volume

## Q2 2025 - Mainnet & Growth

- Deploy to Mezo mainnet
- 100+ merchants onboarded
- Payment plugins (WooCommerce, Shopify)
- Multi-currency (MEUR, MGBP)
- \$100K monthly volume

## Q3 2025 - Scale

- Recurring payments & subscriptions
- Mobile app (React Native)
- Point-of-sale integrations
- 1,000+ merchants
- \$1M monthly volume

## Q4 2025 - Enterprise

- Enterprise API
- Multi-signature support
- Compliance tools
- 10,000+ merchants
- \$10M monthly volume

# Slide 10: Why MUSD Wins

## Unique Value Proposition

### The First Bitcoin-Native Stablecoin

#### What Makes Us Different

Feature	Traditional Stablecoins	MUSD
Wallet	New Ethereum/other wallet	Existing Bitcoin wallet <input checked="" type="checkbox"/>
Seed Phrase	New phrase to manage	No new phrases <input checked="" type="checkbox"/>
Ecosystem	Leave Bitcoin	Stay in Bitcoin <input checked="" type="checkbox"/>
Signing	Ethereum signature	Bitcoin signature <input checked="" type="checkbox"/>
Integration	Complex setup	Mezo Passport <input checked="" type="checkbox"/>

#### Key Advantages

- 1. No Friction** - Use existing Bitcoin wallet, no new setup
- 2. Bitcoin-Native** - Stay in the Bitcoin ecosystem
- 3. Mezo-Powered** - Leverages cutting-edge account abstraction
- 4. Production-Ready** - Complete system with docs and deployment
- 5. Real Use Case** - Solves actual problems for users and merchants

# The Vision

## Enable Bitcoin to power the future of payments

By combining Bitcoin's security and adoption with stablecoin's price stability, MUSD unlocks Bitcoin's potential as a medium of exchange.

Thank You! 🙏
